Profile Summary

- Adept Front End Developer with a proven track record at Skylights Energy, where I leveraged HTML/CSS proficiency and a keen eye for user experience design to elevate web projects.
- Specialized in responsive design and cross-browser compatibility, I consistently delivered solutions that enhanced user engagement and project success.

Experience

Skylights Energy – Frontend Developer

Aug 2023-Present

- Designed and implemented responsive web applications using React and Tailwind CSS.
- Optimized user interfaces for mobile and desktop platforms, achieving a 20% reduction in bounce rates.
- Collaborated with cross-functional teams to deliver three major projects within the deadline.

Projects

Switchonomy | React js, PostgreSQL, GraphQL, Node js, Tailwind CSS, Firebase, Redux

- This website streamlines the creation of quotations for HT and LT electrical panels by providing an intuitive interface and a dynamic, up-to-date price list of switchgear components. It enables users to generate accurate and professional quotes efficiently, saving time and reducing errors.

Switchology | Next js, Node js, GraphQL, PostgreSQL, Zustand

- Monitor and control platform for electrical panels, providing real-time data on voltage and current values. It not only calculates BESCOM electricity bills based on usage but also offers functionalities to control the panel remotely. This ensures seamless monitoring, billing, and management, enhancing operational efficiency and user convenience.

Elbrit | Next js

- The responsive landing page for Elbrit Pharmacy serves as an engaging introduction to the company, highlighting its mission, vision, and core values. Designed with a user-friendly layout, it showcases the company's expertise in pharmaceutical solutions and commitment to quality healthcare.

WebBank | Next js, Tailwind CSS, Appwrite, Plaid, Formik, Chat.js, ShadCN

- A financial SaaS platform that links with various bank accounts, offers real-time transaction viewing, enables users to transfer funds to other platform members, and provides comprehensive financial management.

Technical Skills

Front-End Development: React.js, JavaScript (ES6+), HTML5, CSS3 (including frameworks like Tailwind CSS).

Databases: SQL, PostgreSQL, MongoDB.

Version Control: Git, GitHub/Bitbucket.

Education

Jain University

Bachelor of Technology – CGPA 7.4

Jun 2018 – Jul 2022

Bengaluru, Karnataka

Certifications

- Tap Academy: Java Full Stack Development
